I spoke with Kathy Parker, EPA Emergency Coordinator, and Elizabeth McKenna, EPA Counsel (per Kathy's request). EPA promises to pass along Administrative Order of Consent and Statement of Work to DNR for review prior to finalizing. This document will be signed by Cascade then a Removal Evaluation will be complete for next step in Emergency Action process. Once Emergency Action is complete then RI/FS will be developed and implemented to address remaining contaminants not addressed by Emergency Actions. EPA wants to maintain a cooperative approach and will most likely include language in document that requires reports be provided to DNR for review-they are open to suggestions. This sounds like a good approach to move forward. We will want to evaluate options once Emergency Actions are proposed and during RI/FS process.

FYI-the long-term Remedial Site Manager will be Mark Ader. He will be developing and implementing RI/FS (post Emergency Actions).

Joanne LaBaw is working on having site listed on National Priorities List.

Kathy Parker will lead efforts to develop and implement Emergency Action Plan.

I will send Lindie and Janis documents I receive for review and comment. Let me know if there are further questions.
